

Marc O'Polo

Energy Policy

As a broadly based company, the MARC O'POLO Group has a particular responsibility for environmental protection, economical and efficient use of energy, as well as for climate protection.

MARC O'POLO AG and its subsidiaries

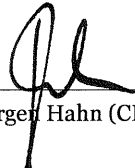

- ↳ Marc O'Polo License AG
- ↳ Marc O'Polo Shoes GmbH
- ↳ Marc O'Polo Accessories GmbH
- ↳ Marc O'Polo Denim & Campus GmbH
- ↳ Marc O'Polo International GmbH
 - ↳ Marc O'Polo Einzelhandels GmbH
 - ↳ Marc O'Polo France SARL

are committed to the following energy policy:

- Predominant purchasing of a sustainably altered energy mix with a reduction of fossil-nuclear sources in favor of renewable energy sources.
- Compliance with legal energy and climate protection laws as a minimum requirement.
- Commitment to continual improvement with regards to our own energy and climate protection performance, in particular energy-related services and minimizing environmental impacts.
- Ensuring economic sustainability in the region by contributing greatly to the added value in the market area through jobs and contracts awarded.
- The principles of an environmentally friendly and resource-conserving operation apply to one's own properties and facilities. This also includes the procurement of energy-efficient plants and services.
- Working according to energy efficient principles in the planning and implementation of construction and redevelopment projects to minimize the impact on the environment, biodiversity and landscape.
- Collecting and documenting data on environmentally relevant areas and measures. In an annual sustainability report, we inform the public about environmental and climate protection services.
